Course Information Sheet Work Safely at Heights

Duration

1 day.

Training and assessments are conducted on the same day.

Why do this course?

Successful completion of this course is considered the minimum requirement for workers that may be working at height in the course of their job.

Many construction sites, mine and quarry sites, and industrial workplaces will ask to see evidence that a worker holds this qualification before being allowed to work on site.

How much does it cost?

The cost of the course includes your enrolment, all course materials, and training and assessment.

Contact us for info on current pricing and group training rates.

Location

Site Safety Services specialise in on-site workplace training. We come to your workplace and deliver training / assessment using your equipment in a familiar environment.

By arrangement we can provide a venue and all required equipment to conduct training when the on-site option doesn't suit. Contact us to see how we can make it work for you.

Site Safety Services (AUS) conducts the training and assessment for this course to meet or exceed any required quality and legislative requirements.

English literacy

Candidates must be able to read and converse in English (without an interpreter or phone translator app.) in order to undertake this course of study.
